APPENDIX 3.14-B, ATTACHMENT 2:
Natural Resources Conservation Service Land Evaluation Explanations and Calculations for Madera County
# Farmland Conversion Impact Rating for Corridor Type Projects

**Part I (To be completed by Federal Agency)**
- **Name of Project**: Merced to Fresno: Central Valley Wye
- **Federal Agency Involved**: Federal Railroad Administration
- **County and State**: Madera County, CA
- **Date Request Received by NRCS**: 12/2/16
- **Date of Land Evaluation Request**: 12/2/16

**Part II (To be completed by NRCS)**
- **Major Crop(s)**: Almonds, grapes, pistachios
- **Formable Land in Government Jurisdiction Acres**: 304248
- **Amount of Farmland As Defined in FPPA Acres**: 237572
- **Date Land Evaluation Returned by NRCS**: 12/8/16

**Part III (To be completed by Federal Agency)**

**Part IV (To be completed by NRCS) Land Evaluation Information**

| A. Total Acres Prime And Unique Farmland | 369 | 622 | 462 | 575 |
| B. Total Acres Statewide And Important Farmland | 497 | 357 | 558 | 531 |
| C. Percentage Of Farmland in County Or Local Govt, Unit To Be Converted | 0.28 | 0.32 | 0.33 | 0.36 |
| D. Percentage Of Farmland in Govt, Jurisdiction With Same Or Higher Relative Value | 38 | 37 | 33 | 37.7 |

**Part V (To be completed by NRCS) Land Evaluation Information Criterion Relative Value of Farmland to Be Serviced or Converted (Scale of 0 - 100 Points)**
- 65

**Part VI (To be completed by Federal Agency) Corridor Assessment Criteria (These criteria are explained in 7 CFR 658.5(c))**

**Reason For Selection:**

**Signature of Person Completing this Part:**

**NOTE:** Complete a form for each segment with more than one Alternate Corridor.
CORRIDOR - TYPE SITE ASSESSMENT CRITERIA

The following criteria are to be used for projects that have a linear or corridor-type site configuration connecting two distant points, and crossing several different tracts of land. These include utility lines, highways, railroads, stream improvements, and flood control systems. Federal agencies are to assess the suitability of each corridor-type site or design alternative for protection as farmland along with the land evaluation information.

1. How much land is in nonurban use within a radius of 1.0 mile from where the project is intended?
   - More than 90 percent - 15 points
   - 90 to 20 percent - 14 to 1 point(s)
   - Less than 20 percent - 0 points

2. How much of the perimeter of the site borders on land in nonurban use?
   - More than 90 percent - 10 points
   - 90 to 20 percent - 9 to 1 point(s)
   - Less than 20 percent - 0 points

3. How much of the site has been farmed (managed for a scheduled harvest or timber activity) more than five of the last 10 years?
   - More than 90 percent - 20 points
   - 90 to 20 percent - 19 to 1 point(s)
   - Less than 20 percent - 0 points

4. Is the site subject to state or unit of local government policies or programs to protect farmland or covered by private programs to protect farmland?
   - Site is protected - 20 points
   - Site is not protected - 0 points

5. Is the farm unit(s) containing the site (before the project) as large as the average-size farming unit in the County?
   (Average farm sizes in each county are available from the NRCS field offices in each state. Data are from the latest available Census of Agriculture, Acreage or Farm Units in Operation with $1,000 or more in sales.)
   - As large or larger - 10 points
   - Below average - deduct 1 point for each 5 percent below the average, down to 0 points if 50 percent or more below average - 9 to 0 points

6. If the site is chosen for the project, how much of the remaining land on the farm will become non-farmable because of interference with land patterns?
   - Acreage equal to more than 25 percent of acres directly converted by the project - 25 points
   - Acreage equal to between 25 and 5 percent of the acres directly converted by the project - 1 to 24 point(s)
   - Acreage equal to less than 5 percent of the acres directly converted by the project - 0 points

7. Does the site have available adequate supply of farm support services and markets, i.e., farm suppliers, equipment dealers, processing and storage facilities and farmer's markets?
   - All required services are available - 5 points
   - Some required services are available - 4 to 1 point(s)
   - No required services are available - 0 points

8. Does the site have substantial and well-maintained on-farm investments such as barns, other storage building, fruit trees and vines, field terraces, drainage, irrigation, waterways, or other soil and water conservation measures?
   - High amount of on-farm investment - 20 points
   - Moderate amount of on-farm investment - 19 to 1 point(s)
   - No on-farm investment - 0 points

9. Would the project at this site, by converting farmland to nonagricultural use, reduce the demand for farm support services so as to jeopardize the continued existence of these support services and thus, the viability of the farms remaining in the area?
   - Substantial reduction in demand for support services if the site is converted - 25 points
   - Some reduction in demand for support services if the site is converted - 1 to 24 point(s)
   - No significant reduction in demand for support services if the site is converted - 0 points

10. Is the kind and intensity of the proposed use of the site sufficiently incompatible with agriculture that it is likely to contribute to the eventual conversion of surrounding farmland to nonagricultural use?
    - Proposed project is incompatible to existing agricultural use of surrounding farmland - 10 points
    - Proposed project is tolerable to existing agricultural use of surrounding farmland - 9 to 1 point(s)
    - Proposed project is fully compatible with existing agricultural use of surrounding farmland - 0 points
