

California High-Speed Rail Authority

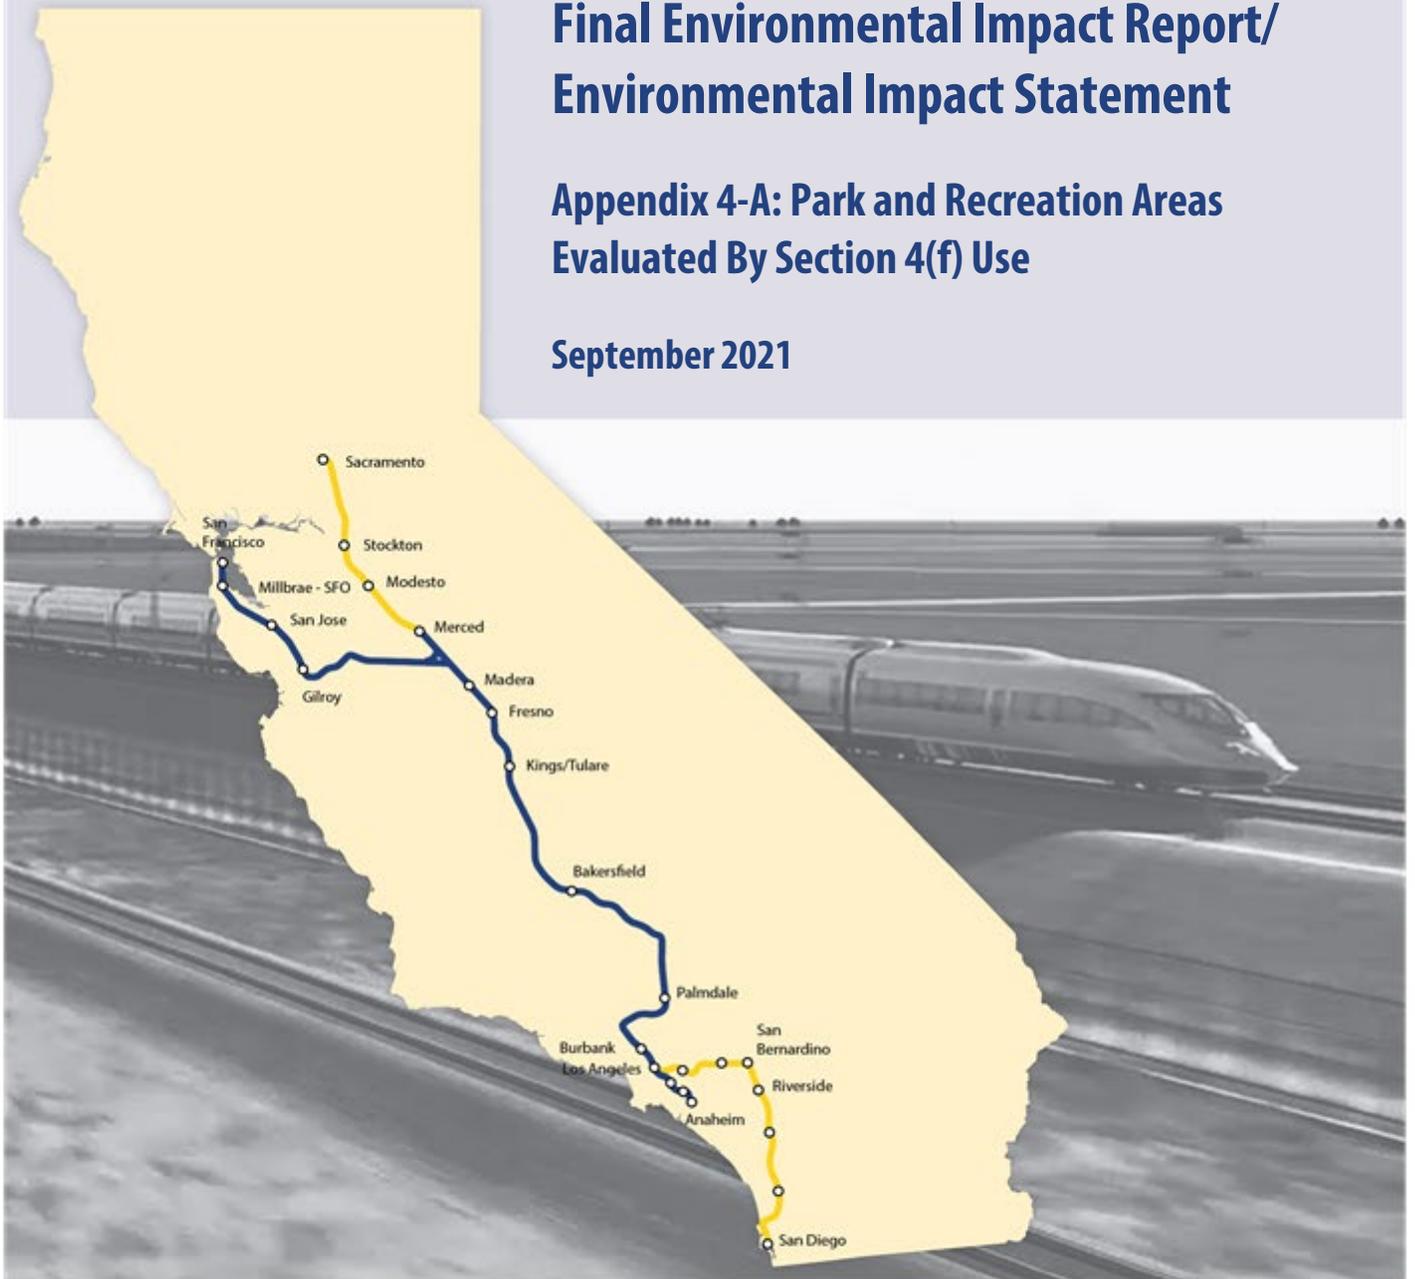

Burbank to Los Angeles

Project Section

**Final Environmental Impact Report/
Environmental Impact Statement**

**Appendix 4-A: Park and Recreation Areas
Evaluated By Section 4(f) Use**

September 2021

The environmental review, consultation, and other actions required by applicable Federal environmental laws for this project are being or have been carried out by the State of California pursuant to 23 U.S.C. 327 and a Memorandum of Understanding dated July 23, 2019, and executed by the Federal Railroad Administration and the State of California.

Resource Number	Property Name	Description	Official(s) with Jurisdiction	Why It Qualifies Under Section 4(f)	Distance from the Project Footprint	Description of Effect from HSR Build Alternative	Section 4(f) Use Determination
B-1	San Fernando Bike Path (Planned Phase 3)	<p>Location: Burbank-Los Angeles City limit to Downtown Burbank Metrolink Station in the City of Burbank</p> <p>Size: Phases 1 and 2 have already been constructed and total 6 miles in length; Phase 3 is a planned portion of the bike path that includes a 4.28-mile portion in the City of Los Angeles, and a 2.93 mile portion in the City of Burbank. The planned Phase 3 portion of the San Fernando Bike Path in the City of Burbank is located inside the study area with potential to be affected by the project, and is therefore included in this analysis.</p> <p>Features: Class I (off-street) bike path</p> <p>Access: From Burbank-Los Angeles City limit to Downtown Metrolink Station in the City of Burbank (bicycle access)</p>	City of Burbank Parks and Recreation and Community Development Departments	Once constructed, Phase 3 of the San Fernando Bike Path would be publicly owned and open to the public. The planned Phase 3 of the bike path in the City of Burbank has been formally designated in the City of Burbank Bicycle Master Plan (City of Burbank 2009).	0 feet (in the project footprint)	The project would require a permanent easement on a 0.28-mile portion of the resource, which would require that this portion of the planned Class I bike path be rerouted as a Class II bike lane, to the west of the Burbank Water Reclamation Plant, along North Lake Street. The affected portion of the planned Phase 3 of the San Fernando Bike Path is minor in size (approximately ¼ mile) in relation to the entire Phase 3 of the bike path (approximately 3 miles). Project implementation would still allow for the San Fernando Bike Path to connect to the Downtown Burbank Metrolink Station, which is being designed to accommodate the bike path. The project would also require a temporary construction easement on a 0.4-mile portion of this resource. The remaining portion of the bike path outside of the construction area would remain open for public use during construction. The project would not adversely affect the activities, features, or attributes that qualify the bike path for protection under Section 4(f). Therefore, the project would result in a <i>de minimis</i> impact on this resource (see Section 4.6.1).	<i>De Minimis</i> Impact

Resource Number	Property Name	Description	Official(s) with Jurisdiction	Why It Qualifies Under Section 4(f)	Distance from the Project Footprint	Description of Effect from HSR Build Alternative	Section 4(f) Use Determination
B-2	Chandler Bikeway (Existing and Planned Extension)	<p>Location: The existing bike path is located along West Chandler Boulevard between North Clybourn Avenue and North Mariposa Street. The planned extension of the bike path would connect at the eastern terminus on Mariposa Street to Downtown Burbank Metrolink Station.</p> <p>Size: A total of 2.68 miles in length (of which 1.98 miles are the existing bike path, and 0.7 mile is the planned extension)</p> <p>Features: Existing Class I (off-street) bike path with planned extension</p> <p>Access: From North Clybourn Avenue to North Mariposa Street for the existing bike path (bicycle access) and from North Mariposa Street to Downtown Burbank Metrolink Station for the planned extension (bicycle access)</p>	City of Burbank Parks and Recreation and Community Development Departments	Once constructed, the planned extension would be publicly owned and open to the public. The planned extension has been formally designated in the City of Burbank Bicycle Master Plan (City of Burbank 2009).	<p>Existing Bike Path: Approximately 1,265 feet</p> <p>Planned Extension: 0 feet (in the project footprint)</p>	The project would require a temporary construction easement on a 0.16-mile portion of the proposed alignment for the planned bike path extension. The temporary construction easement would be required for temporary staging activities during the removal of existing industrial tracks adjacent to the Chandler Road Bike Path. The temporary construction easement would meet the five conditions under 23 C.F.R. 774.13(d), and would therefore not constitute a use (see Section 4.6.1).	No Use

Resource Number	Property Name	Description	Official(s) with Jurisdiction	Why It Qualifies Under Section 4(f)	Distance from the Project Footprint	Description of Effect from HSR Build Alternative	Section 4(f) Use Determination
P-1	Robert E. Gross Park	<p>Location: 2800 West Empire Avenue in the City of Burbank</p> <p>Size: 4.87 acres</p> <p>Features: A lighted ball field, picnic tables, and a playground</p> <p>Access: From West Empire Avenue (pedestrian and vehicular access)</p>	City of Burbank Parks and Recreation Department	The resource is publicly owned and is open to the public.	9 feet	The project would require a subsurface (tunnel construction) easement area along West Empire Avenue and the adjacent sidewalk along the northern portion of the park. All of the project improvements and proposed work would be completed outside the resource boundaries; therefore, no permanent use or temporary occupancy would result from the project. Because the HSR Build Alternative would operate within a tunnel in this portion of the study area, any use of this resource would be avoided. No further analysis is required.	No Use

Resource Number	Property Name	Description	Official(s) with Jurisdiction	Why It Qualifies Under Section 4(f)	Distance from the Project Footprint	Description of Effect from HSR Build Alternative	Section 4(f) Use Determination
P-2	Vickroy Park	<p>Location: 2300 W. Monterey Place, in the City of Burbank.</p> <p>Size: 1.47 acres.</p> <p>Features: A basketball court, horseshoe pit, outdoor table tennis, picnic tables, and a playground.</p> <p>Access: Along West Monterey Place (pedestrian and vehicular access)</p>	City of Burbank Parks and Recreation Department	The resource is publicly owned and is open to the public.	Approximately 940 feet	All of the project improvements and proposed work would be completed outside the resource boundaries; therefore, no permanent use or temporary occupancy would result from the project. Because the resource is separated from the project footprint by multiple buildings and parking lots, the project would not result in indirect noise, visual, or access impacts (proximity impacts) that would substantially impair the resource. Therefore, no constructive use would result from the project. No further analysis is required.	No Use
P-3	Five Points Plaza	<p>Location: 1075 W. Burbank Boulevard, in the City of Burbank</p> <p>Size: 0.6 acre</p> <p>Features: A historic monument, benches, trees, shady areas</p> <p>Access: Along Victory Boulevard (pedestrian and vehicular access)</p>	City of Burbank Parks and Recreation Department	The resource is publicly owned and is open to the public.	Approximately 100 feet	All of the project improvements and proposed work would be completed outside the resource boundaries; therefore, no permanent use or temporary occupancy would result from the project. Because the resource is separated from the project footprint by multiple buildings and parking lots, the project would not result in indirect noise, visual, or access impacts (proximity impacts) that would substantially impair the resource. Therefore, no constructive use would result from the project. No further analysis is required.	No Use

Resource Number	Property Name	Description	Official(s) with Jurisdiction	Why It Qualifies Under Section 4(f)	Distance from the Project Footprint	Description of Effect from HSR Build Alternative	Section 4(f) Use Determination
S-1	Providencia Elementary School	<p>Location: 1919 North Ontario Street in the City of Burbank</p> <p>Size: 3.4 acres of recreational area</p> <p>Features: Basketball courts, a children's play area, and handball courts</p> <p>Access: From North Ontario Street and West Pacific Avenue (pedestrian access)</p>	Burbank Unified School District	The resource is publicly owned, and the school's recreational areas are open to the public.	Approximately 250 feet	All of the project improvements and proposed work would be completed outside the resource boundaries; therefore, no permanent use or temporary occupancy would result from the project. Because the resource is separated from the project footprint by multiple buildings and parking lots, the project would not result in indirect noise, visual, or access impacts (proximity impacts) that would substantially impair the resource. Therefore, no constructive use would result from the project. No further analysis is required.	No Use
S-2	Monterey High School/ Magnolia Park School	<p>Location: 1915 Monterey Avenue in the City of Burbank</p> <p>Size: 0.75 acre of recreational area</p> <p>Features: Ball courts and open play areas</p> <p>Access: From North Lamer Street and North Parish Place (pedestrian access)</p>	Burbank Unified School District	The resource is publicly owned, and the school's recreational areas are open to the public.	Approximately 210 feet	All of the project improvements and proposed work would be completed outside the resource boundaries; therefore, no permanent use or temporary occupancy would result from the project. Because the HSR Build Alternative would operate within a tunnel in this portion of the study area, any use of this resource would be avoided. No further analysis is required.	No Use

Resource Number	Property Name	Description	Official(s) with Jurisdiction	Why It Qualifies Under Section 4(f)	Distance from the Project Footprint	Description of Effect from HSR Build Alternative	Section 4(f) Use Determination
B-3	Golden State Connector Bike Path (Under Construction)	<p>Location: Adjacent to Interstate 5 (I-5) in the vicinity of Providencia Avenue in the City of Burbank</p> <p>Size: 0.33 mile in length</p> <p>Features: Existing pedestrian-bicycle bridge that crosses the railroad corridor adjacent to I-5. This bridge is being rebuilt in the vicinity of Verdugo Avenue as part of the freeway's high-occupancy vehicle lane construction project.</p> <p>Access: From South Flower Street and South Bonnywood Place (bicycle access)</p>	City of Burbank Parks and Recreation, Community Development, and Public Works Departments	The resource is publicly owned and, and once constructed, will be open to the public.	0 feet (above the project footprint)	The project would require a temporary construction easement on 0.3 acre of land beneath the resource to construct at-grade HSR tracks within the existing railroad right-of-way and to relocate utilities along Flower Street. As of the date of this report, the original pedestrian-bike bridge has been demolished, but is currently under construction to be rebuilt as part of the Caltrans I-5 Improvement Project. If the bike path is completely rebuilt prior to HSR construction, the bike path would remain open during construction, and no access impacts would result from the project. Because all of the project improvements and proposed work would be completed beneath the bike path, the bike path would remain untouched by the project, and no direct impacts on the bike path would result from the project. Therefore, no use would result from the project (see Section 4.6.1).	No Use

Resource Number	Property Name	Description	Official(s) with Jurisdiction	Why It Qualifies Under Section 4(f)	Distance from the Project Footprint	Description of Effect from HSR Build Alternative	Section 4(f) Use Determination
B-4	Burbank Western Channel Bike Path (Planned Phase II)	<p>Location: Along Burbank-Western Flood Control Channel from West Alameda Avenue to the Downtown Burbank Metrolink Station in the City of Burbank</p> <p>Size: Phase I of the bike path is a 0.4-mile portion that has already been constructed outside the study area; Phase II is a 1-mile planned portion of the Class I bike path that is located inside the study area.</p> <p>Features: Class I (off-street) bike path</p> <p>Access: From West Alameda Avenue to the Downtown Burbank Metrolink Station</p>	City of Burbank Parks and Recreation and Community Development Departments	Once constructed, Phase II of the Burbank Western Channel Bike Path would be publicly owned and open to the public. The planned Phase II of the bike path has been formally designated in the City of Burbank Bicycle Master Plan (City of Burbank 2009).	0 feet (in the project footprint)	All of the project improvements and proposed work would be completed outside the resource boundaries; therefore, no permanent use or temporary occupancy would result from the project. Indirect access, noise, or visual impacts (proximity impacts) would not substantially impair the activities, features, or attributes of the property. Therefore, no constructive use would result from the project (see Section 4.6.1).	No Use

Resource Number	Property Name	Description	Official(s) with Jurisdiction	Why It Qualifies Under Section 4(f)	Distance from the Project Footprint	Description of Effect from HSR Build Alternative	Section 4(f) Use Determination
B-5	San Fernando Railroad Bike Path (Planned)	<p>Location: San Fernando Road from northern to southern City limits in the City of Glendale</p> <p>Size: 4.5 miles in length</p> <p>Features: Planned Class I (off-street) bike path along San Fernando Road (officially Metrolink Valley railroad corridor)</p> <p>Access: From Allen Avenue to Tyburn Street (bicycle)</p>	City of Glendale Community Development and Public Works Departments	Once constructed, the resource would be publicly owned and open to the public. The planned bike path has been formally designated in the City of Glendale Bicycle Transportation Plan (City of Glendale 2012).	0 feet (in the project footprint)	The project would require a permanent easement within the Metro-owned right-of-way, along the entire 4.5-mile planned bike path, to operate HSR trains in this area. As a result, the permanent easement needed for operation of the HSR Build Alternative would preclude the planned San Fernando Railroad Bike Path from being constructed if the bike path is not existing at the time of HSR construction. If the planned bike path is already existing at the time of HSR construction, the entire bike path would be permanently incorporated into the permanent easement area required for the HSR right-of-way. Therefore, the permanent easement on the land planned for the bike path would constitute a permanent use of the entire resource (see Section 4.6.1).	Permanent Use
B-6	Glendale Narrows Riverwalk (includes Glendale Narrows Riverwalk [bikeway])	<p>Location: Adjacent to the north bank of the Los Angeles River from Garden Street/Paula Avenue to Flower Street in the City of Glendale</p> <p>Size: 1 mile in length</p> <p>Features: Class I (off-street) bike path</p> <p>Access: From Garden Street/Paula Avenue to Flower Street (bicycle access)</p>	City of Glendale Community Development and Public Works Departments	The resource is publicly owned and is open to the public.	Approximately 900 feet	All of the project improvements and proposed work would be completed outside the resource boundaries; therefore, no permanent use or temporary occupancy would result from the project. Indirect access, noise, or visual impacts (proximity impacts) are not anticipated because of the distance of the resource from the project footprint, and the resource is separated from the project by multiple buildings and parking lots. Therefore, no constructive use would result from the project. No further analysis is required.	No Use

Resource Number	Property Name	Description	Official(s) with Jurisdiction	Why It Qualifies Under Section 4(f)	Distance from the Project Footprint	Description of Effect from HSR Build Alternative	Section 4(f) Use Determination
B-7	Los Angeles River Bike Path (Planned)	<p>Location: Along the west bank of the Los Angeles River, connecting approximately 7 miles from the north side of Griffith Park at Riverside Drive (at Zoo Drive) along the Los Angeles River to Figueroa Street in Elysian Valley in the City of Los Angeles (bike path is also referred to as the Los Angeles River Greenway Trail); an 8-mile extension is planned in Downtown Los Angeles</p> <p>Size: 7 miles in length for existing path, 8 miles in length for planned extension</p> <p>Features: Class I (off-street) bike path, with an equestrian trail running parallel to some portions of the bike path</p> <p>Access: From Riverside Drive, Los Feliz Boulevard, Glendale Boulevard, Crystal Street, Marsh Street Nature Park, Elysian Valley Gateway Park, Dallas Street, Riverdale Avenue, Meadowvale, Avenue, Shoredale Avenue, Harwood Street, Gatewood Street, Steelhead Park,</p>	City of Los Angeles Departments of Recreation and Parks and Public Works, County of Los Angeles Departments of Recreation and Parks and Public Works	The resource is publicly owned and is open to the public.	0 feet (in the project footprint)	The project overlaps with the planned extension options of the Los Angeles River Bike Path in several areas. The project would require a permanent easement for maintenance access only along the planned extension of the Los Angeles River Bike Path for project operation. The affected portion of the planned extension of the bike path appear to be minor in size in relation to the entire extension of the bike path, although exact acreages of impact were not generated because of the multiple alignment options for the path. The project would not result in the lost use or functionality of the resource, and connectivity would be maintained. Portions of the planned extension of the Los Angeles River Bike Path may also be required for construction activities. Detours would be implemented during construction, in coordination with the official with jurisdiction over the bike path, so that access around the construction area would be maintained. The remaining portion of the bike path outside of the construction area would remain open for public use during construction. The project would not adversely affect the activities, features, or attributes that qualify the bike path for protection under Section 4(f). Therefore, the project would result in a <i>de minimis</i> impact on this resource (see Section 4.6.1).	<i>De Minimis</i> Impact

Resource Number	Property Name	Description	Official(s) with Jurisdiction	Why It Qualifies Under Section 4(f)	Distance from the Project Footprint	Description of Effect from HSR Build Alternative	Section 4(f) Use Determination
		Egret Park, and Figueroa Street (bicycle access)					
B-8	Verdugo Wash Bike Path (Planned)	<p>Location: Verdugo Wash Channel that runs from north Glendale to the Los Angeles River in the City of Glendale</p> <p>Size: 7.8 miles in length</p> <p>Features: Proposed Class I (off-street) bike path</p> <p>Access: From San Fernando Road, Country Club Drive, Crescenta Park (bicycle access)</p>	City of Glendale Community Development and Public Works Departments	Once constructed, the resource would be publicly owned and open to the public. The planned bike path has been formally designated in the City of Glendale Bicycle Transportation Plan (City of Glendale 2012).	0 feet (in the project footprint)	The project would require a temporary construction easement on 0.02 acre of land above the bike path on San Fernando Road, which crosses over the channel, for utility relocation. In addition, the existing railroad bridge west of San Fernando Road would be demolished, and a new, wider bridge would be built across the channel to accommodate HSR tracks. The new bridge is a clear-span bridge with no construction required inside the channel. Because all of the project improvements and proposed work would be completed above the bike path, the bike path would remain untouched by the project, and no direct impacts on the bike path would result from the project. Therefore, no use would result from the project (see Section 4.6.1).	No Use

Resource Number	Property Name	Description	Official(s) with Jurisdiction	Why It Qualifies Under Section 4(f)	Distance from the Project Footprint	Description of Effect from HSR Build Alternative	Section 4(f) Use Determination
P-4	Robert Ovrom Community Center and Park	<p>Location: 601 South San Fernando Road in the City of Burbank</p> <p>Size: 0.17 acres</p> <p>Features: Community rooms, assembly rooms available for rent, a kitchen, a children's play area, outdoor basketball courts, barbecue areas, picnic tables, and an open grass field</p> <p>Access: From East Providencia Avenue (pedestrian and vehicular access), and from South San Fernando Road and East Cedar Avenue (pedestrian access)</p>	City of Burbank Parks and Recreation Department	The resource is publicly owned and is open to the public.	Approximately 790 feet	All of the project improvements and proposed work would be completed outside the resource boundaries; therefore, no permanent use or temporary occupancy would result from the project. Indirect access, noise, or visual impacts (proximity impacts) are not anticipated because of the distance of the resource from the project footprint, and the resource is separated from the project by multiple buildings and parking lots. Therefore, no constructive use would result from the project. No further analysis is required.	No Use

Resource Number	Property Name	Description	Official(s) with Jurisdiction	Why It Qualifies Under Section 4(f)	Distance from the Project Footprint	Description of Effect from HSR Build Alternative	Section 4(f) Use Determination
P-5	Griffith Manor Park	<p>Location: 1551 Flower Street in the City of Glendale</p> <p>Size: 2.9 acres</p> <p>Features: A community building that can be rented for special events, picnic areas, basketball courts, a children's play area, open play fields, and walking paths</p> <p>Access: From Flower Street (pedestrian and vehicular access)</p>	City of Glendale Community Services and Parks Department	The resource is publicly owned and is open to the public.	Approximately 240 feet	All of the project improvements and proposed work would be completed outside the resource boundaries; therefore, no permanent use or temporary occupancy would result from the project. Project elements that would be constructed approximately 244 feet or more from the park include the retained fill along the existing railroad right-of-way and the new Sonora Avenue grade separation. After project implementation, HSR trains would run approximately 500 feet northeast of the park. Indirect access, noise, or visual impacts (proximity impacts) would not substantially impair the activities, features, or attributes of the property. Therefore, no constructive use would result from the project (see Section 4.6.1).	No Use
P-6	Pelanconi Park	<p>Location: 1000 Grandview Avenue in the City of Glendale</p> <p>Size: 3.1 acres</p> <p>Features: Picnic tables, barbecue areas, basketball courts, a baseball field, and a children's play area</p> <p>Access: From Grandview Avenue (pedestrian access) and Cleveland Road (pedestrian and vehicular access)</p>	City of Glendale Community Services and Parks Department	The resource is publicly owned and is open to the public.	Approximately 205 feet	All of the project improvements and proposed work would be completed outside the resource boundaries; therefore, no permanent use or temporary occupancy would result from the project. Indirect access, noise, or visual impacts (proximity impacts) are not anticipated because the resource is separated from the project by multiple buildings and roadways. Therefore, no constructive use would result from the project. No further analysis is required.	No Use

Resource Number	Property Name	Description	Official(s) with Jurisdiction	Why It Qualifies Under Section 4(f)	Distance from the Project Footprint	Description of Effect from HSR Build Alternative	Section 4(f) Use Determination
W-1	Los Angeles River Wildlife Refuge	Location: Los Angeles County; originates in the Simi Hills and Santa Susana Mountains and empties into the Pacific Ocean at Long Beach Length: 51 miles Features: Wildlife and waterfowl resources and their habitat	City of Los Angeles Department of Recreation and Parks and Department of Public Works and Los Angeles County Department of Parks and Recreation and Department of Public Works	The U.S. Fish and Wildlife Service established an urban wildlife refuge partnership associated with the Los Angeles River.	0 feet (in the project footprint)	Construction activities may directly and indirectly affect special-status bird species and migratory birds through the disturbance of potential nesting habitat. In addition, the project would include a grade separation at Main Street, which would require new piers to be constructed within the river channel in an area totaling 0.03 acre. These activities could result in impacts on aquatic resources. However, impact avoidance and minimization features and mitigation measures would be implemented to reduce impacts on special-status natural communities, special-status species and their habitat, aquatic resources, and wildlife movement corridors associated with the Los Angeles River. In addition, compensatory mitigation for impacts to aquatic resources would be implemented if required by regulatory agencies, including the U.S. Army Corps of Engineers. Therefore, the project would not adversely affect the activities, features, or attributes that qualify the Los Angeles River for protection under Section 4(f) as a wildlife refuge. Therefore, the project would result in a <i>de minimis</i> impact on this resource (see Section 4.6.1).	<i>De Minimis</i> Impact

Resource Number	Property Name	Description	Official(s) with Jurisdiction	Why It Qualifies Under Section 4(f)	Distance from the Project Footprint	Description of Effect from HSR Build Alternative	Section 4(f) Use Determination
P-7	Pacific Park and Community Center	<p>Location: 501 South Pacific Avenue in the City of Glendale</p> <p>Size: 5.74 acres</p> <p>Features: Five meeting rooms, a gymnasium, a computer laboratory, recreation rooms with billiards, table tennis, ping pong, children’s play area, a softball field, outdoor basketball courts, barbecue areas, picnic tables, soccer field, tennis courts, and a six-lane swimming pool</p> <p>Access: From South Pacific Avenue (pedestrian access), and Riverdale Drive, and South Kenilworth Avenue (pedestrian and vehicular access)</p>	City of Glendale Community Services and Parks Department	The resource is publicly owned and is open to the public.	Approximately 240 feet	<p>All of the project improvements and proposed work would be completed outside the resource boundaries; therefore, no permanent use or temporary occupancy would result from the project. Project elements that would be constructed approximately 175 feet from the park include utility relocation along San Fernando Road and the new Goodwin Avenue Grade separation. After project implementation, HSR trains would run approximately 450 feet west of the park. Indirect access, noise, or visual impacts (proximity impacts) would not substantially impair the activities, features, or attributes of the property. Therefore, no constructive use would result from the project (see Section 4.6.1).</p>	No Use

Resource Number	Property Name	Description	Official(s) with Jurisdiction	Why It Qualifies Under Section 4(f)	Distance from the Project Footprint	Description of Effect from HSR Build Alternative	Section 4(f) Use Determination
P-8	Cerritos Park	<p>Location: 3690 San Fernando Road in the City of Glendale</p> <p>Size: 0.89 acre</p> <p>Features: An open play area, a children's play area, picnic tables, and walkways</p> <p>Access: From South Glendale Avenue (pedestrian and vehicular access), and from San Fernando Road and South Brand Boulevard (pedestrian access)</p>	City of Glendale Community Services and Parks Department	The resource is publicly owned and is open to the public.	0 feet (adjacent to the project footprint)	All of the project improvements and proposed work would be completed outside of the park boundaries; therefore, no permanent use or temporary occupancy would result from the project. The project would require a temporary construction easement on the sidewalk adjacent to the park to relocate oil and fiber line utilities. During construction, directional boring on San Fernando Road would be conducted for the utility relocation. After project implementation, HSR trains would run approximately 0.2 mile west of the park. Indirect access, noise, or visual impacts (proximity impacts) would not substantially impair the activities, features, or attributes of the property. Therefore, no constructive use would result from the project (see Section 4.6.1).	No Use
P-9	Juntos Family Park	<p>Location: 3135 Drew Street in the City of Los Angeles</p> <p>Size: 1.64 acres</p> <p>Features: Children's play area, picnic benches, and open fields</p> <p>Access: From Chapman Street and Drew Street (pedestrian access)</p>	City of Los Angeles Department of Recreation and Parks	The resource is publicly owned and is open to the public.	Approximately 680 feet	All of the project improvements and proposed work would be completed outside the resource boundaries; therefore, no permanent use or temporary occupancy would result from the project. Indirect access, noise, or visual impacts (proximity impacts) are not anticipated because of the distance of the resource from the project footprint, and the resource is separated from the project by multiple buildings and parking lots. Therefore, no constructive use would result from the project. No further analysis is required.	No Use

Resource Number	Property Name	Description	Official(s) with Jurisdiction	Why It Qualifies Under Section 4(f)	Distance from the Project Footprint	Description of Effect from HSR Build Alternative	Section 4(f) Use Determination
P-10	Taylor Yard G1 Parcel (Bowtie Parcel) (Planned)	<p>Location: 2850 Kerr Street, in the City of Los Angeles</p> <p>Size: 17 acres</p> <p>Features: Habitat restoration areas and passive recreation, including interpretive exhibits and a multi-use trail; since 2014, the site has been used for artist projects, performances, and events</p> <p>Access: From Los Angeles River Greenway Trail (bicycle access), Rio de Los Angeles State Park (pedestrian access), and Via Molina (vehicular access)</p>	California Department of Parks and Recreation	The resource is publicly owned and is open to the public.	0 feet (adjacent to the project footprint)	All of the project improvements and proposed work would be completed outside the resource boundaries; therefore, no permanent use or temporary occupancy would result from the project. After project implementation, HSR trains would run adjacent to the park. Indirect access, noise, or visual impacts (proximity impacts) would not substantially impair the activities, features, or attributes of the property. Therefore, no constructive use would result from the project (see Section 4.6.1).	No Use
P-11	Lewis MacAdams Riverfront Park (formerly Marsh Park) (includes Marsh Street Nature Park)	<p>Location: 2999 Rosanna Street in the City of Los Angeles</p> <p>Size: 3.9 acres</p> <p>Features: A skate park, a nature park with a play meadow, nature trails, health and fitness stations, picnic shelter, and outdoor classrooms</p> <p>Access: From Rosanna Street (pedestrian access)</p>	Mountains Recreation and Conservation Authority	The resource is publicly owned and is open to the public.	Approximately 830 feet (Marsh Street Nature Park: Approximately 600 feet)	All of the project improvements and proposed work would be completed outside the resource boundaries; therefore, no permanent use or temporary occupancy would result from the project. Indirect access, noise, or visual impacts (proximity impacts) are not anticipated because of the distance of the resource from the project footprint, and the resource is separated from the project by the Los Angeles River, multiple buildings, and parking lots. Therefore, no constructive use would result from the project. No further analysis is required.	No Use

Resource Number	Property Name	Description	Official(s) with Jurisdiction	Why It Qualifies Under Section 4(f)	Distance from the Project Footprint	Description of Effect from HSR Build Alternative	Section 4(f) Use Determination
P-12	Elysian Valley Gateway Park	<p>Location: 2914 Knox Avenue in the City of Los Angeles</p> <p>Size: 0.32 acre</p> <p>Features: A lawn, picnic benches, and interpretive exhibits</p> <p>Access: From Knox Avenue (pedestrian access) and Los Angeles River Greenway Trail (bicycle access)</p>	Santa Monica Mountains Conservancy, Mountains Recreation and Conservation Authority, and the City of Los Angeles Department of Recreation and Parks	The resource is publicly owned and is open to the public.	Approximately 580 feet	All of the project improvements and proposed work would be completed outside the resource boundaries; therefore, no permanent use or temporary occupancy would result from the project. Indirect access, noise, or visual impacts (proximity impacts) are not anticipated because of the distance of the resource from the project footprint, and the resource is separated from the project by the Los Angeles River and vacant land. Therefore, no constructive use would result from the project. No further analysis is required.	No Use

Resource Number	Property Name	Description	Official(s) with Jurisdiction	Why It Qualifies Under Section 4(f)	Distance from the Project Footprint	Description of Effect from HSR Build Alternative	Section 4(f) Use Determination
P-13	Taylor Yard G2 River Park (Planned)	<p>Location: 2850 Kerr Street, in the City of Los Angeles</p> <p>Size: 43.6 acres</p> <p>Features: Elevated walkways, trails, and bike paths, a one-acre dog park, an amphitheater, an access point for L.A. River kayaking, 8.2 acres for day camps, overnight camping, training exercise, nature programs, film screenings and music events, platforms for bird watching, picnicking, and access to the Los Angeles River</p> <p>Access: From Los Angeles River Greenway Trail (bicycle access), Rio de Los Angeles State Park (pedestrian access), and Via Molina (vehicular access)</p>	City of Los Angeles Department of Recreation and Parks	The resource is publicly owned and, once constructed, would be open to the public.	0 feet (adjacent to the project footprint)	All of the project improvements and proposed work would be completed outside the resource boundaries; therefore, no permanent use or temporary occupancy would result from the project. After project implementation, HSR trains would run adjacent to the park. Indirect access, noise, or visual impacts (proximity impacts) would not substantially impair the activities, features, or attributes of the property. Therefore, no constructive use would result from the project (see Section 4.6.1).	No Use

Resource Number	Property Name	Description	Official(s) with Jurisdiction	Why It Qualifies Under Section 4(f)	Distance from the Project Footprint	Description of Effect from HSR Build Alternative	Section 4(f) Use Determination
P-14	Rio de Los Angeles State Park	<p>Location: 1900 North San Fernando Road in the City of Los Angeles</p> <p>Size: 39.4 acres</p> <p>Features: A natural play area, soccer fields, running track, basketball courts, baseball fields, bike paths, tennis courts, picnic areas, amphitheater, hiking trails, and a community building</p> <p>Access: From North San Fernando Road (pedestrian and vehicular access)</p>	California Department of Parks and Recreation	The resource is publicly owned and is open to the public.	0 feet (in the project footprint)	<p>The project would require permanent improvements to 0.56 acre of land along the southern boundary of the park. Kerr Road would be lowered adjacent to the park, which would require grading of the existing vegetated slope within the park boundary. The affected portion of Rio de Los Angeles State Park is minor in size (0.56 acre) in relation to the entire the park (39.4 acres). Although permanent improvements would be completed within the official park boundary, these project elements would not alter the function of the park because the improvements would be completed outside of the park's fence line. The existing vegetated slope is adjacent to grass fields, but is not developed with any other recreational amenities. Therefore, no recreational resources would be affected by the project. The project would not adversely affect the activities, features, or attributes that qualify the bike path for protection under Section 4(f). Therefore, the project would result in a <i>de minimis</i> impact on this resource (see Section 4.6.1).</p>	<i>De Minimis</i> Impact

Resource Number	Property Name	Description	Official(s) with Jurisdiction	Why It Qualifies Under Section 4(f)	Distance from the Project Footprint	Description of Effect from HSR Build Alternative	Section 4(f) Use Determination
P-15	Steelhead Park	<p>Location: On the corner of Oros Street and The Los Angeles River Greenway Trail in the City of Los Angeles</p> <p>Size: 0.2 acre</p> <p>Features: An outdoor amphitheater, lawn, picnic benches, and decorative exhibits</p> <p>Access: From Oros Street (pedestrian access) and Los Angeles River Greenway Trail (bicycle access)</p>	Santa Monica Mountains Conservancy, Mountains Recreation and Conservation Authority, and City of Los Angeles Department of Recreation and Parks	The resource is publicly owned and is open to the public.	Approximately 410 feet	All of the project improvements and proposed work would be completed outside the resource boundaries; therefore, no permanent use or temporary occupancy would result from the project. Indirect access, noise, or visual impacts (proximity impacts) are not anticipated because of the distance of the resource from the project footprint, and the resource is separated from the project by the Los Angeles River and vacant land. Therefore, no constructive use would result from the project. No further analysis is required.	No Use
P-16	Los Angeles River Center and Gardens	<p>Location: 570 West Avenue 26 in the City of Los Angeles</p> <p>Size: 6.69 acres</p> <p>Features: Decorative exhibits, a nature center, special event facility, walking trails, and picnic tables</p> <p>Access: Two entrances on West Avenue 26 (one is pedestrian access only and the other is pedestrian and vehicular access), and two entrances on North San Fernando Road (one is pedestrian access only and the other is pedestrian and vehicular access)</p>	Santa Monica Mountains Conservancy, Mountains Recreation and Conservation Authority, and City of Los Angeles Department of Recreation and Parks	The resource is publicly owned and is open to the public.	0 feet (adjacent to the project footprint)	All of the project improvements and proposed work would be completed outside of the park boundaries; therefore, no permanent use or temporary occupancy would result from the project. The project would require a temporary construction easement on the sidewalk adjacent to the park to relocate oil and fiber line utilities. After project implementation, HSR trains would run approximately 100 feet west of the recreation center. Indirect access, noise, or visual impacts (proximity impacts) would not substantially impair the activities, features, or attributes of the property. Therefore, no constructive use would result from the project (see Section 4.6.1).	No Use

Resource Number	Property Name	Description	Official(s) with Jurisdiction	Why It Qualifies Under Section 4(f)	Distance from the Project Footprint	Description of Effect from HSR Build Alternative	Section 4(f) Use Determination
P-17	Oso Park	<p>Location: On the corner of Oros Street and Blake Avenue in the City of Los Angeles</p> <p>Size: 0.2 acre</p> <p>Features: An outdoor amphitheater, lawn, picnic benches, and decorative exhibits</p> <p>Access: From Oros Street, Blake Avenue, and Riverside Drive (pedestrian access)</p>	Santa Monica Mountains Conservancy, Mountains Recreation and Conservation Authority, and City of Los Angeles Department of Recreation and Parks	The resource is publicly owned and is open to the public.	Approximately 540 feet	All of the project improvements and proposed work would be completed outside the resource boundaries; therefore, no permanent use or temporary occupancy would result from the project. Indirect access, noise, or visual impacts (proximity impacts) are not anticipated because of the distance of the resource from the project footprint, and the resource is separated from the project by multiple residential buildings and the Los Angeles River. Therefore, no constructive use would result from the project. No further analysis is required.	No Use
P-18	Egret Park	<p>Location: On the corner of Riverside Drive and North Arnold Street in the City of Los Angeles</p> <p>Size: 0.05 acre</p> <p>Features: View points of the river, native plantings, and interpretive displays</p> <p>Access: From Riverside Drive (pedestrian access) and Los Angeles River Greenway Trail (bicycle access)</p>	Santa Monica Mountains Conservancy, Mountains Recreation and Conservation Authority, and City of Los Angeles Department of Recreation and Parks	The resource is publicly owned and is open to the public.	Approximately 330 feet	All of the project improvements and proposed work would be completed outside the resource boundaries; therefore, no permanent use or temporary occupancy would result from the project. Indirect access, noise, or visual impacts (proximity impacts) are not anticipated because of the distance of the resource from the project footprint, and the resource is separated from the project by the Los Angeles River and vacant land. Therefore, no constructive use would result from the project. No further analysis is required.	No Use

Approximately 45 feet	All of the project improvements and proposed work would be completed outside the resource boundaries; therefore, no permanent use or temporary occupancy would result from the project. After project implementation, HSR trains would run adjacent to the park. Indirect access, noise, or visual impacts (proximity impacts) would not substantially impair the activities, features, or attributes of the property. Therefore, no constructive use would result from the project (see Section 4.6.1).	No Use

Resource Number	Property Name	Description	Official(s) with Jurisdiction	Why It Qualifies Under Section 4(f)	Distance from the Project Footprint	Description of Effect from HSR Build Alternative	Section 4(f) Use Determination
T-2	Rim of the Valley Trail (planned)	<p>Location: Within the Rim of the Valley Corridor, which is bounded by the north, east, and west edges of the San Fernando and La Crescenta Valleys</p> <p>Length: 200 miles</p> <p>Features: Long distance hiking trail for hikers, equestrians, and mountain bikers</p> <p>Access: 3429 Markridge Road, La Crescenta, CA 91214</p>	Santa Monica Mountains Conservancy	The resource is publicly owned and, once constructed, would be open to the public.	0 feet (adjacent to/above the project footprint)	All of the project improvements and proposed work would be completed outside the resource boundaries; therefore, no permanent use or temporary occupancy would result from the project. After project implementation, HSR trains would run adjacent to/beneath the trail. Indirect access, noise, or visual impacts (proximity impacts) would not substantially impair the activities, features, or attributes of the property. Therefore, no constructive use would result from the project (see Section 4.6.1).	No Use
P-22	Los Angeles State Historic Park	<p>Location: 1245 North Spring Street in the City of Los Angeles</p> <p>Size: 32 acres</p> <p>Features: Bike trails, walking trails, and open lawn areas</p> <p>Access: From North Spring Street (pedestrian and vehicular access)</p>	California Department of Parks and Recreation, Angeles District	The resource is publicly owned and is open to the public.	Approximately 105 feet	All of the project improvements and proposed work would be completed outside the resource boundaries; therefore, no permanent use or temporary occupancy would result from the project. Project elements that would be constructed near this resource include the new Main Street grade separation. After project implementation, HSR trains would run adjacent to and north of the park. Indirect access, noise, or visual impacts (proximity impacts) would not substantially impair the activities, features, or attributes of the property. Therefore, no constructive use would result from the project (see Section 4.6.1).	No Use

Resource Number	Property Name	Description	Official(s) with Jurisdiction	Why It Qualifies Under Section 4(f)	Distance from the Project Footprint	Description of Effect from HSR Build Alternative	Section 4(f) Use Determination
P-23	Albion Riverside Park	<p>Location: 1739 Albion Street in the City of Los Angeles</p> <p>Size: 6.2 acres</p> <p>Features: Bike paths, athletic fields, a community center, walking paths, picnic areas, water quality features, and open, natural areas</p> <p>Access: From South Avenue 17 (pedestrian and vehicular access)</p>	City of Los Angeles Department of Recreation and Parks	The resource is publicly owned, and once constructed, will be open to the public.	0 feet (in the project footprint)	<p>The project would require a permanent easement on three localized areas within a 0.12-acre portion of land in the southern corner of the park. In this area, the permanent easement would be required to accommodate the pier walls necessary to support the new Main Street roadway bridge. The affected portion of Albion Riverside Park is minor in size (0.12 acre) in relation to the entire park (6.2 acres). The new bridge would be an elevated structure spanning over the tracks on the west bank, the Los Angeles River, and the tracks on the east bank. Although the piers would be placed within the official park property boundary, this impact area would not alter the function of the park because the land required to support the new Main Street roadway bridge would be in the southern portion of the park where there are no recreational amenities. The land in this impact area currently functions as a paved area with an existing cell tower. Therefore, no recreational resources would be affected by the project. The project would not adversely affect the activities, features, or attributes that qualify the bike path for protection under Section 4(f). Therefore, the project would result in a <i>de minimis</i> impact on this resource (see Section 4.6.1).</p>	<i>De Minimis</i> Impact

Therefore, no constructive use would result from the project. No further analysis is required.	No Use
S-11	Ann Street Elementary School	<p>Location: 126 East Bloom Street in the City of Los Angeles</p> <p>Size: Approximately 0.5 acre of recreational area</p> <p>Features: Playground, ball courts, and paved play areas</p> <p>Access: From East Ann Street and North Main Street (pedestrian access)</p>	Los Angeles Unified School District	The resource is publicly owned, and the school's recreational areas are open to the public.	Approximately 590 feet	All of the project improvements and proposed work would be completed outside the resource boundaries; therefore, no permanent use or temporary occupancy would result from the project. Indirect access, noise, or visual impacts (proximity impacts) are not anticipated because of the distance of the resource from the project footprint, and the resource is separated from the project by multiple buildings and parking lots. Therefore, no constructive use would result from the project. No further analysis is required.	No Use
