High-Speed Rail in Northern California

New high-speed rail infrastructure will be built at the existing BART/Caltrain Station, including a new station entrance hall with ticketing and support services.

Millbrae-SFO Station

The station will continue to serve Caltrain and BART, offering a link to SFO. Changes proposed to accommodate high-speed rail trains include:

- Two new tracks and new high-speed rail platform
- Overhead pedestrian crossing to connect high-speed rail to Caltrain and BART
- Extension of California Drive to Victoria Avenue for station access
- Replacement parking for displaced Caltrain and BART parking
- New signals and pedestrian crossings at Chadbourne Avenue and El Camino Real
- New dedicated bicycle path for westside station access
